SIZING TIPS

Our numeric sized products (such as some custom apparel) are designed to fit the specific measurements. All of our size charts reference body measurements.

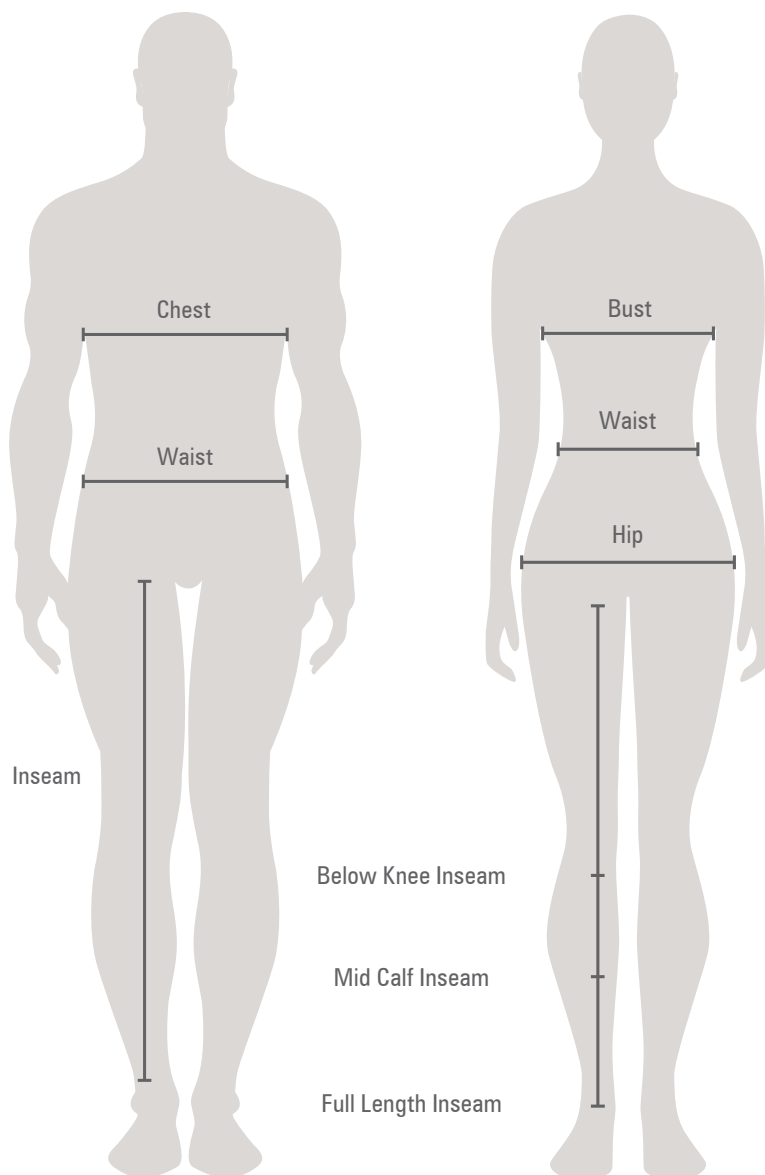

HOW TO TAKE BODY MEASUREMENTS

If a cloth measuring tape is not available, use a string and then measure the length against a yard stick. If possible, have someone else take the measurement.

Chest/Bust – With your arms relaxed at your side, measure the circumference of your chest. Hold the end of the tape at the fullest part of your bust, go under your armpits, around your shoulder blades and back to the front of your chest. Keep the tape level and taut, but not stretched.

Waist – Standing straight up and measure your waist at your “natural waistline” which is located above your belly button. Hold the end of the tape at the front of your body and circle around the back to measure the circumference of your waist. No cheating – don’t suck in your stomach.

Hip – Start the tape at one hip and circle the tape around the largest part of your backside and over your other hip until you are back where you started. Keep the tape level and taut, but not stretched.
