TECHNOLOGY

3N2 WAS BORN ON THE BALLFIELD

– the product of both experience and opportunity: The collective experience we share as die-hard softball and baseball players and the opportunity to fill a need. That need? Footwear designed by players, for players. Footwear that addresses the dynamic relationship between comfort and performance.

KZONE COOL – Keeps You Cool
KZONE rapid evaporation technology employs 100% Polyzone™ microfiber construction to keep athletes cool, dry and comfortable when the heat is on. KZONE performance wear and accessories are soft, lightweight and incredibly durable.

KZONE WARM – Keeps You Warm
KZONE technology fine-tunes muscle temperature while enabling rapid evaporation of skin moisture, keeping you dry and warm when temperatures drop. KZONE performance wear features an exterior poly microfiber shell and thin, lightweight interior poly fleece.

O-ZONE – Antimicrobial Shield
O-ZONE is powered by patented Agion® technology and defends against insole odor. Unlike other antimicrobials, Agion® is natural and non-toxic, employing silver ions to attack and inhibit the growth of odor causing microbes.

BOUNCEBACK – Midsole Technology
The advanced design of the sleek BOUNCEBACK midsole system utilizes an integrated air-bubble to provide unbelievably responsive cushioning, spring and impact absorption. The bubble is suspended midheel to best counter and soften downward force.

FLASHPOINT – Flame-Laminated Construction
A revolutionary process that eliminates the need for toxic glues in footwear manufacturing. Using FLASHPOINT, 3N2 shoe components are affixed to one another through flame lamination, resulting in a lighter, more durable shoe that is also environmentally and worker friendly.

SOFTSHIELD – Proprietary Apparel
SoftShield is an outer protective apparel covering made from a proprietary material blend that is both extremely water resistant, supple and soft to the touch. Currently featured in 3N2's line of RBI Fleece apparel.

IGNITE – Proprietary Outsole
Light up the diamond with IGNITE – our classic, rugged turf outsole boasting a single-form tread pattern that provides the uniform support and rotational traction needed to confidently power around bases.

ROTOGRIP – Proprietary Outsole
3N2's ROTOGRIP outsole is created from a revolutionary dual-injection process, employing a rugged compound to protect cleat tips from premature wear, and a more supple base material for maximum flex and support. Its 12-cleat configuration features a rotary heel for sure footing on any surface, quick cutting and instant acceleration. Added durability comes courtesy of a subtly raised TPU toe bumper.

PROPIVOT – Cleat Configuration
Developed in conjunction with 3N2 athletes, the proprietary PROPIVOT cleat configuration features a center-flex tread pattern specifically designed to maximize speed, traction and batting power.

METAMESH – Mesh Technology
METAMESH is an advanced synthetic mesh that maintains the lightweight flexibility and breathability of conventional mesh while providing unprecedented abrasion-resistance and durability ratings that are off the charts.

LEVIT 8 – Proprietary Midsole
The lighter-than-air, injection-molded LEVIT 8 is one of the lightest midsoles 3N2 has ever produced. Although more expensive than traditional EVA, injection molding results in a higher-quality, lighter and more durable midsole with less environmental waste.

ELEV 8 – Proprietary Midsole
The feather-light ELEV 8 is a 3N2 classic – the compression-molded, pro-caliber midsole featured on the entire line of 3N2 professional spikes. Heralded for its durability, cushion and spring, the ELEV 8 is a true performance booster.

PT – Pitching Toe
Protect your cleats from premature wear with the insanely tough PT PITCHING TOE. The PT is designed and engineered for highly fluid toe drag and is made from a revolutionary rubber compound that is lighter and more durable than traditional pitching toes.

GLIDE – Proprietary Midsole
Keep a spring in your step game-after-game with the GLIDE – our lightweight, compression-molded EVA midsole specifically designed to relieve pressure on the knees and back, providing unparalleled comfort and performance.

FUEGO-8 – Proprietary Outsole
FUEGO-8 is our premiere-pro, 8-spike cleat configuration custom designed from next-gen materials to meet the unique performance demands of professional athletes. Features a flame-patterned, dual-color TPU outsole.

FLEXCORE – Insole Technology
The FLEXCORE form-fitting insole achieves a snug, ergonomic fit through its unique spiral, flex-groove design. A foam core provides optimum shock absorption, while an integrated forefoot flex-plate provides maximum impact resistance against cleat pressure. Lined with O-ZONE antimicrobial shield.

JACKRABBIT – Proprietary Midsole
The JACKRABBIT EVA heel spring system provides cushioned comfort and rapid response performance to power athletes through even the toughest training regimen.

REVV – Proprietary Outsole
Bust out of the batters box in the REVV, our advanced grip, speed-enhancing outsole with a dual-form tread pattern for easy pivoting and powering around the bases. Its 3N2 custom-designed TPU shank provides arch support and flexibility.

NITRO-9 – Proprietary Outsole
The NITRO-9 molded outsole features an aggressive, TPU nine-cleat configuration inset into a highly flexible, wave-patterned plate. Enables explosive starts, dead stops and breakneck base running.

GROOVE – Proprietary Outsole
Stride right with GROOVE, 3N2's grid based, single-sole technology. GROOVE is a feather light 'unisole' that cushions without constricting, allowing your foot to flex freely, improving strength and natural movement.

POGO – Proprietary Midsole
The 3N2 POGO is an advanced, injection-molded Phylon midsole designed to minimize both underfoot cleat pressure and athlete response time. The injection process makes POGO one of lightest weight midsoles on the market with one of the longest lasting cushions. Injection molding is also environmentally friendly, greatly reducing the amount of waste associated with conventional molding.

PATENTED

THE ORIGINAL YOGA-INSPIRED SOFTBALL PANT, FIT SO PERFECT – IT'S PATENTED!

The patented **3N2 NuFIT 3/4 KNICKER** maintains the innovative, fit-meets function design of the original NuFIT Knicker but with additional features and functionality. The 3/4 Knicker has an inseam length that finishes just below the knee and comes in two waist styles – with and without belt loops. It employs 4-way stretch poly-spandex fabric in the hips, thighs, calves, and backside to snugly hug curves and provide free and easy movement. Rugged poly-knit construction in the knees, hips and the outside of the leg protect the pant from sliding. Comfort comes courtesy of a low-rise fit in the front, a higher rise in back to ensure coverage, and a soft elastic cuff that doesn't rub or cut like traditional elastic band cuffs. Two convenient back pockets are built into all NuFIT styles.

Fastpitch athletes no longer have to roll their waistbands or worry about pulling up the back of their pants. Coaches have the benefit of a pant that looks great on all their players.

The fit and fabric of NuFit Knicker fastpitch softball pants provide a flattering look for the wide-range of body types playing fastpitch softball. Inspired by women's lifestyle apparel, the fit features a unique yoke with a lower front rise for comfort, while offering full coverage for the back side.

The NuFit Knicker is the first fastpitch softball pant to address the realities of athletic function and female form. No other pant on the market provides durability in the actual high abrasion areas that fastpitch softball athletes put to the test game in and game out on the diamond.

Other pants assume that softball players slide on their knees, while fastpitch athletes are actually coached to slide on the sides of their upper leg and inner knee, which is where NuFit Knicker fastpitch softball pants provide extra coverage.

SIZING TIPS

Our numeric sized products (such as some custom apparel) are designed to fit the specific measurements. All of our size charts reference body measurements.

HOW TO TAKE BODY MEASUREMENTS

If a cloth measuring tape is not available, use a string and then measure the length against a yard stick. If possible, have someone else take the measurement.

Chest/Bust – With your arms relaxed at your side, measure the circumference of your chest. Hold the end of the tape at the fullest part of your bust, go under your armpits, around your shoulder blades and back to the front of your chest. Keep the tape level and taut, but not stretched.

Waist – Standing straight up and measure your waist at your “natural waistline” which is located above your belly button. Hold the end of the tape at the front of your body and circle around the back to measure the circumference of your waist. No cheating – don’t suck in your stomach.

Hip – Start the tape at one hip and circle the tape around the largest part of your backside and over your other hip until you are back where you started. Keep the tape level and taut, but not stretched.
